

## **Human Factors in Nuclear Decommissioning**

**16 October 2017**  
**Hilton Manchester Airport, UK**

Britain today faces one of the most complex, long-term, environmental challenges – that of decommissioning 17 nuclear sites. It's Europe's largest remediation programme, and will take decades. What are the human factors issues that need to be addressed in order to achieve this? What skills can human factors practitioners bring to ensure these issues are investigated and dealt with effectively and sustainably?

## **Human Factors in Aviation Safety**

**13-14 November 2017**  
**Hilton Gatwick Airport, UK**

How do we improve human performance in today's aviation business? Representatives from airlines, air traffic control organisations, industry regulators and investigators, consultants and the major university research groups will examine a range of human factors issues in aviation safety in both the military and commercial sectors.
